

幼児資格取得プログラム

# EARLY CHILDHOOD EDUCATION

STARTING JANUARY 2024

We are committed to delivering an exceptional career training experience to each student. The foundation of the program is based upon absolute respect for children, family, ECE colleagues, community, and the early years learning environment. You will learn how to observe children, implement activities, share pedagogical narrations, meet administration needs, and engage in ongoing reflective practice. You will learn the importance of high-quality early learning and childcare environments that meet the needs and standards for ECE in British Columbia. Students that complete the Basic ECE Program will be given a Certificate in Early Childhood Education. You will be eligible to apply for **Early Childhood Educator Certificate** from the ECE Registry.

**UPON THE COMPLETION OF THE PROGRAM, GRADUATES WILL HAVE THE ABILITY TO:**

- » Communicate and collaborate effectively with children, families, community, and colleagues
- » Conduct regular observations and documentation to assess the curriculum and children's learning processes, growth, and development
- » Demonstrate the ability to successfully guide children's learning and behaviour, using a range of positive and respectful child and group guidance techniques
- » Plan and implement an integrated program that is age-appropriate, culturally sensitive, and meets the individual needs and interests of each child in inclusive early childhood programs
